

AMENDMENTS TO THE SPECIFICATION

IN THE SPECIFICATION:

Page 1

Please amended the Specification beginning on page 1 line 21 ending at line 26 as follows:

Japanese Patent Laying-Open No. ~~2-257358~~ 2-257258 has disclosed a technique, in which a recognition result is displayed, and a window independent of this display of the recognition result is also displayed for displaying therein an image of a line, which is included in the recognition result and is located in the same position as a cursor, together with the cursor. In these two kinds of display, the displayed cursors move in an interlocking fashion.
